Hi Jamie,

Thanks for providing this information regarding the proposed changes to the Agricultural Mitigation Program. This appears to be a beneficial project that will provide valuable flood protection to nearby agricultural land. The City can submit a revised Agricultural Mitigation Program which replaces the denitrifying system and rangeland enhancement projects with the flood protection easement project, and we will provide approval of the updated mitigation program. Could you also provide additional details on the Levee Relocation project itself, including a map showing the location of the existing levee and the location where the levee will be moved to? This request is mostly for our own benefit of understanding the work that CSLRCD will be completing once the easement is provided.
